Privacy Policy for DevMate

Last Updated: October 5, 2025

1. Introduction

Thank you for using DevMate — a Chrome extension designed to help developers view, copy, and manage local storage keys efficiently. Your privacy is important to us. This policy explains what data the extension handles and how it is managed.

2. Data Collection and Usage

DevMate does not collect, store, or transmit any personal or sensitive information. The extension only reads local storage data that already exists in your browser to display it for you. All data stays on your local machine — it is never sent to any remote servers or third parties.
DevMate may request limited permissions (such as access to storage or activeTab) strictly to function correctly. These permissions are used solely within your browser session and are never used for tracking or analytics.

3. Third-Party Services

DevMate does not use any analytics, advertising, or tracking services. It does not communicate with any external APIs or databases.

4. Data Security

Since no personal data is collected or transmitted, there is no risk of unauthorized access to your information. All actions happen locally in your browser environment.

5. Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be reflected on this page with an updated "Last Updated" date.

6. Contact

If you have any questions or concerns about this Privacy Policy or DevMate, please contact: lifeonshort@gmail.com

Summary: DevMate is a privacy-friendly tool. No tracking, no remote servers, no data collection. Everything stays on your local machine.
